

June 2020

Notes to support the table

The industry is committed to reporting as quickly as practically possible, some one month in arrears.

"Monthly mortality (%)" = the percentage of fish lost on each farm within each month. This is reported as a percentage of the total number of fish on the farm each month. This is the measure of mortality used by the Scottish Government's Fish Health Inspectorate when assessing the health of the fish on the farm.

Further analysis shows that the overall monthly mortality for the industry was:

1.35% in January	1.55% in August	0.95% in March 2019	2.79% in October 2019	0.92% in May 2020
0.94% in February	1.57% in September	1.33% in April 2019	1.76% in November 2019	0.72% in June 2020
1.49% in March	1.49% in October	0.83% in May 2019	1.10% in December 2019	
1.32% in April	1.07% in November	1.06% in June 2019	1.26% in January 2020	
0.76% in May	1.03% in December	1.36% in July 2019	0.95% in February 2020	
0.54% in June	1.15% in January 2019	1.30% in August 2019	1.13% in March 2020	
1.05% in July	1.05% in February 2019	2.24% in September 2019	1.17% in April 2020	

"Cumulative mortality over full production cycle (%)" = the percentage of fish that have died on a farm during the entire production cycle, given as a percentage of the total number of fish that were initially stocked on the farm. It can only be reported once the entire farm has been fully harvested and fallowed.

Cumulative mortality refers to mortality over the entire production cycle. Therefore, an industry-wide figure can only be calculated once all fish from a specific generation or year class have been harvested. It usually takes 2 years to rear a salmon to harvest.

"Fallow" = the farm was fallow or empty throughout the entire reporting month.

"Farm stocked in Jun." = the farm was fallow or empty at the start of the month but was restocked during the month.

"Farm fallowed in Jun." = the farm was stocked at the start of the month but became fallow or empty during that month.

"In production" = the farm is stocked and a cumulative mortality figure will be reported once all fish are harvested.

"Farm fallowed - fish not harvested" = The farm became fallow, but not because the fish were harvested. e.g. the fish may have been moved to another farm.

Company	Farm	Monthly mortality (%)	Notes	Cumulative mortality over full production cycle (%)
Cooke Aquaculture (Scotland)	Balta Isle	0.1		In production
Cooke Aquaculture (Scotland)	Bastaness	0.7		In production
