Please note: The Marulaig Bay farm has been updated as being fallowed in April. This information was updated in June 2019.

Notes to support the table

Sea lice are adult females, presented as monthly averages (per fish).

Farms count sea lice every week. Figures are reported by calendar month. Therefore some months include five full weeks and some include four full weeks to cover the 52 weeks of the year.

"Fallow" = the farm was fallow or empty throughout the entire reporting month.

"Farm stocked in Apr." = the farm was fallow or empty at the start of the month but was restocked during the month.

"Farm fallowed in Apr." = the farm was stocked at the start of the month but became fallow or empty during that month.

"No count – harvesting" = fish were being harvested throughout the month. Under such circumstances it is not always possible to record the lice count.

"Broodstock fish - visual checks" - the fish on the farm are broodstock and they were checked visually without removing them from the water.

"No count - farm recently stocked" - the farm was recently stocked and it may not have been possible or appropriate to record a lice count.

Statistics for April 2019

There are 196 active salmon farms in Scotland.

Of these, 170 (or 87%) were stocked at some point during April 2019.

This means 26 (or 13%) of the active farms were fallow or empty throughout April 2019.
