Notes to support the table

Sea lice are adult females, presented as monthly averages (per fish).

Farms count sea lice every week. Figures are reported by calendar month. Therefore some months include five full weeks and some include four full weeks to cover the 52 weeks of the year.

"Fallow" = the farm was fallow or empty throughout the entire reporting month.

"Farm stocked in Aug." = the farm was fallow or empty at the start of the month but was restocked during the month.

"Farm fallowed in Aug." = the farm was stocked at the start of the month but became fallow or empty during that month.

"No count – harvesting" = fish were being harvested throughout the month. Under such circumstances it is not always possible to record the lice count.

"Broodstock fish - visual checks" - the fish on the farm are broodstock and they were checked visually without removing them from the water.

"No count - farm recently stocked" - the farm was recently stocked and it may not have been possible or appropriate to record a lice count.

Statistics for August 2020

There are 210 active salmon farms in Scotland.

Of these, 153 (or 73%) were stocked at some point during August 2020.

This means 57 (or 27%) of active farms were fallow or empty throughout August 2020.
